

Maximize your take-home income with a Flexible Spending Account

Your flexible spending account (FSA) is a special account that allows you to set aside money from your paycheck before taxes to pay for certain medical expenses. This means you can reduce your taxable income by the amount you contribute to your FSA, which can result in a higher take-home pay. For example, if you contribute \$100 to your FSA, you can reduce your taxable income by \$100, which could result in a higher take-home pay. This is a great way to save money on your taxes and pay for your medical expenses.
